

MK-CPS Cleaning tool for carbon stained commutator

Commu Polisher Set Instruction manual

Please read this manual before use.

* Motor is not included in the kit

New Commu Polisher is a tool that cleans and polishes the dirty commutator quickly. By using motor's own brush spring, the polishing stick won't press your commutator so hard, it will just push the stick with just right pressure to clean your commutator.

①

Remove a brush spring and a brush from the brush hood then insert polishing stick into it.

②

Find the slot on the polishing stick then place a brush spring to sit properly.

③

Insert the aluminum dial to motor shaft. Than tighten set screw with 1.5 allen driver.

④

Turn the dial counter clock wise about 10times. Commutator will be polished as new.

Optional parts: MK-CPM Commu Polisher Stick (Medium)

Spare parts: MK-CPH Commu Polisher Stick (Hard)
